SUMMARY

JavaScript software engineer who builds web applications end to end, from the database to the server they run on. I designed, built and run Trastfer, a booking platform in production in four languages, and I'm building Bunzzle, an open-source email delivery engine.

EXPERIENCE

Founder · Bunzzle, Remote — Oct 2026 – Present

- Building Bunzzle (bunzzle.com), an open-source engine that delivers email straight to recipients' mail servers.
- One binary with reputation built in: IP warm-up, adaptive sending speeds, bounce handling and DKIM rotation.
- Contained by design: five sandboxed processes, every email encrypted with its own key, fuzz-tested parsers.
- Delivers around 1,480 emails per second with TLS and DKIM on a 2-CPU machine.

TypeScript, Bun, SQLite, SMTP, DKIM, systemd, Docker

Software Engineer (sole developer) · ATY VIP Turizm, Antalya — Feb 2026 – Present

- Designed and built Trastfer (trastfer.ru), an airport transfer booking platform, from requirements to production: data model, booking flow, customer accounts and an admin panel for bookings.
- Automated operations with scheduled jobs (pickup reminders, unconfirmed and abandoned booking checks) and transactional emails in four languages.
- Built the SEO foundation: 40+ destination pages, structured data and localized sitemaps in English, Russian, Turkish and German.
- Run it in production on a self-hosted VPS with Docker: releases, server, backups and health checks.

Next.js, TypeScript, PostgreSQL, Drizzle, Better Auth, TanStack Query, next-intl, React Email, Docker

Frontend Developer Intern · Hedefsan Elektronik, Istanbul — Sep 2023 – Nov 2023

- Built frontend features in React and TypeScript on a production codebase, with every change reviewed by the team lead.
- First team workflow: Git branching, pull requests, code review and sprint meetings.

OPEN SOURCE

Node.js · Documented constructor comparison in assert.deepStrictEqual. Merged, nodejs/node#60253, Jan 2026.

SKILLS

Frontend	TypeScript, JavaScript, React, Next.js, Astro, TanStack Query, Tailwind CSS
Backend	Node.js, Bun, NestJS, PostgreSQL, SQLite, MongoDB, Drizzle, Prisma
Infrastructure	Docker, Linux VPS, GitHub Actions, CI/CD
Testing	Vitest, Playwright, Jest
Practices	REST APIs, authentication, SMTP, email authentication (DKIM, SPF), i18n, SEO, Git, code review

EDUCATION

Trakya University
Associate of Science, Web Design and Development
Sep 2024 – Jun 2026

LANGUAGES

Turkish (native)
English (B2)
Russian (A2)

CERTIFICATIONS

IBM Full-Stack JavaScript Developer Professional Certificate · IBM

MongoDB Certified Associate Developer · MongoDB
